Recessed Mounting

1 **Power Safety First**

Turn Off Power: Ensure power is switched off before beginning the installation.

2 **Ceiling Load Check**

Verify Ceiling Support: Confirm the ceiling structure can handle the panel light's weight.

3 **Prepare Ceiling Opening**

Cut Mounting Slot: Create a groove/opening in the ceiling that matches the panel size. **(Refer to Figure 1)**

4 **Electrical Wiring**

Connect Wiring: Join power wires to the panel with proper insulation and sealing. **(Refer to Figure 2)**

5 **Adjust Mounting Clips**

Fold Spring Clips: Bend the four side clips to a 90° angle for insertion. **(Refer to Figure 3)**

6 **Insert Panel**

Secure into Ceiling: Push the panel into the cut-out to lock it in place. **(Refer to Figure 4)**

Suspended (Lifting) Mounting

1 **Power Safety First**

Turn Off Power: Disconnect power before installation.

2 **Install Ceiling Fixers**

Mount Suspension Anchors: Fix the suspension wire brackets to the ceiling. **(Refer to Figure 5)**

3 **Attach Wires**

Hang Suspension Wires: Connect the suspension wires to the ceiling fixers. **(Refer to Figure 6)**
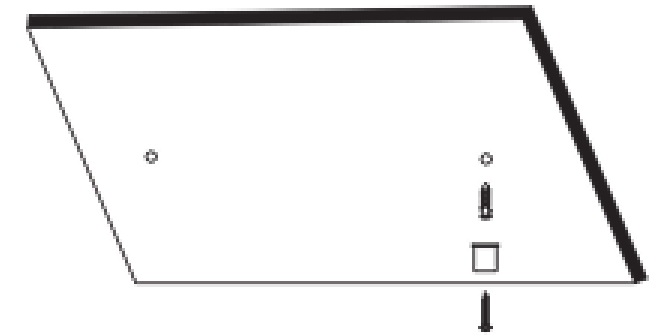

4 **Hook the Panel**

Hang the Panel Light: Hook the LED panel onto the suspension wires. **(Refer to Figure 7)**

5 **Power Connection**

Connect and Insulate Wires: Link the power cable to the light and seal the joints for safety.

Backup Driver Installation
(If Applicable)

1 **Mount the Bracket**
Install Fixture Bracket: Attach the mounting bracket to the back of the LED panel.

2 **Attach the Driver**
Secure Backup Driver: Mount the driver unit onto the rear bracket.

3 **Wire the Driver**
Connect Backup Driver: Route the driver's wiring through the compartment and follow the wiring diagram for correct connections.
